

Instructions for ARMADILLO “Turbo” Filter Machine

Take unit out of the box and assemble according to the diagram enclosed.

1. Open fryer door, install drain spout, position filter unit below drain spout.
2. **TURN OFF FRYER**, pull baskets and tube screen out of the fryer pot.
3. Pour in **1-2 cups** of Magnesol XL without making a cloud of dust.
4. Open drain valve carefully and empty pot into filter unit.
5. Remove wand from wand holder, hold wand over pot and turn on pump switch.
6. Use wand to rinse down fryer pot and wash all fryer debris out the drain.
7. Turn off pump motor.
8. Return wand to wand holder on pump.
9. Turn on pump and let it circulate and ‘polish’ the oil for eight (8) minutes.
10. Use this time to scrub and clean the pot with green scrub pad or stainless steel sponge. Do not use water, soap, or de-greasing agents.
11. Turn off pump motor, remove wand to fryer pot and turn motor back on. Use wand to final rinse fryer pot.
12. Close the drain valve and allow the pump to transfer filtered oil back to the fryer.
13. Let the pump pull all the oil it can from filter. It will sputter quite a bit at the end. Then turn pump motor off.
14. Place wand back in filter pump holder, and remove drain spout (caution hot).
15. Turn fryer back on, and top off with fresh oil.
16. Use spatula to scrape debris off the filter in bottom of unit, and go to the next fryer and repeat process 1 thru 15. At the end of the filter session, we recommend disconnecting the pump motor hose from the standpipe and, with “hot” glove, scrape the debris off the filter pad over the garbage can. **DO NOT WASH WITH WATER -- DO NOT THROW THE FILTER AWAY!** You will use the filter for one week and then replace with a new one each (pick a day of the week). Wipe down the filter pump unit and store it until the next filter session.

We recommend filtering at least twice per day when the oil is hot, with ‘polishing’ at least once per day with Magnesol XL. This really is a simple process and will take about 10 minutes per pot (first time might take a little longer). But, it will not take long to learn the process.

We will set you up for an automatic delivery of 10 filters every 10 weeks so you do not have to worry about filters. We will be in touch with you in a day or so to see how things are working. Thank you for your business.
